UM OFFERS INTRODUCTORY COMPUTER COURSE

"Introduction to Computers," a 10-day course giving an overview of what a computer is and how it works, will be offered by the University of Montana Mondays through Fridays, April 1 through 14. The class will meet from 5 to 6 p.m. in Liberal Arts 302.

Walter J. Briggs of the UM computer science faculty will teach the course, which deals with digital computer organization, computer operations, computer number systems and assembly language.

Briggs said there are no prerequisites for the course, and lack of math background and programming skills will not be a problem.

The course may be taken for one undergraduate credit in Computer Science 299. The cost is \$30. Registration will be completed at the first class meeting.

Further information is available at the Center for Continuing Education, 125 Main Hall, University of Montana, Missoula 59812; telephone 243-2900.
